while the mediterranean is often considered a distinct unified space recent scholarship on the early modern history of the sea has suggested that this perspective is essentially a western one devised from the vantage point of imperial power that historically patrolled the region s seas and controlled its ports by contrast for the peoples of its southern shores the mediterranean was polymorphous shifting with the economic and seafaring exigencies of the moment nonetheless by the nineteenth century the idea of a monolithic mediterranean had either been absorbed by or imposed on the populations of the region in french mediterraneans editors patricia m e lorcin and todd shepard offer a collection of scholarship that reveals the important french element in the nineteenth and twentieth century creation of the singular mediterranean these essays provide a critical study of space and movement through new approaches to think about the maps migrations and margins of the sea in the french imperial and transnational context by reconceptualizing the mediterranean this volume illuminates the diversity of connections between places and polities that rarely fit models of nation state allegiances or preordained geographies

an unprecedented look at secret documents showing the deliberate nature of the armenian genocide introducing new evidence from more than 600 secret ottoman documents this book demonstrates in unprecedented detail that the armenian genocide and the expulsion of greeks from the late ottoman empire resulted from an official effort to rid the empire of its christian subjects presenting these previously inaccessible documents along with expert context and analysis taner ak[?] am s most authoritative work to date goes deep inside the bureaucratic machinery of ottoman turkey to show how a dying empire embraced genocide and ethnic cleansing although the deportation and killing of armenians was internationally condemned in 1915 as a crime against humanity and civilization the ottoman government initiated a policy of denial that is still maintained by the turkish republic the case for turkey s official history rests on documents from the ottoman imperial archives to which access has been heavily restricted until recently it is this very source that ak[?] am now uses to overturn the official narrative the documents presented here attest to a late ottoman policy of turkification the goal of which was no less than the radical demographic transformation of anatolia to that end about one third of anatolia s 15 million people were displaced deported expelled or massacred destroying the ethno religious diversity of an ancient cultural crossroads of east and west and paving the way for the turkish republic by uncovering the central roles played by demographic engineering and assimilation in the armenian genocide this book will fundamentally change how this crime is understood and show that physical destruction is not the only aspect of the genocidal process
